FOREWORD

The Rural Development Act of 1972 has spurred interest in rural development and provided a framework for action. Many working in this area have been without literature or information resources to make important decisions. They are constantly seeking information on new ideas, strategies, procedures, and techniques appropriate to their purposes. This selective bibliography attempts to satisfy this need by providing references with annotations in seven key rural development areas, and some suggestions on where to get information or help.

Community leaders, rural development committees, researchers, and community resource development (CRD) personnel should find this publication useful as a starting point in identifying and obtaining literature or information for program design and implementation. Seven subject areas have received concentrated attention. They are:

- Fire and Emergency Services
- Health Care Delivery Systems
- Sanitary Services and Sewage Systems
- Manpower Training and Vocational Education
- Public Recreational Facilities and Planning
- Local Government Structure and Taxation
- Rural Housing

These are subjects often neglected or less readily known to CRD personnel and rural development committees. Other important areas such as land-use planning have not been included because of the proliferation of literature on this and other rural development topics. The bibliography is not intended to be complete. Only those publications felt to provide maximum and continuing value are listed. The closeout date on citations is June 1975. The limitation to 1969-75 literature was introduced to ensure the most up-to-date coverage. Only publications directly treating rural development in the United States were included, and emphasis was placed on national or regional applicability. A few local studies or findings which could serve as models were cited, however.

The bibliography is the result of a dollar investment by the National Agricultural Library at the Southern Rural Development Center which invested an equal or greater amount of labor to compile the bibliography. Hundreds of letters were sent to rural development individuals, agencies, and organizations throughout the United States for information, bibliographies, and copies of materials. People knowledgeable in specialized fields were asked to recommend sources and citations, and to review the final compilations.

The sources of information will serve as a useful adjunct to the bibliography. Together they should provide those involved in rural development with a new base of knowledge.

HOW TO GET THE PUBLICATIONS

Availability of documents, publishers, prices, and journal citations are given to assist in acquiring the literature when needed. Most of the State land-grant libraries will have the publications for loan or photocopy, OR will be able to assist in obtaining them. Where the item is not free from the publisher, it is suggested that the land-grant libraries be the first source utilized.

Periodical and Journal Articles

Try your State land-grant library first, or ask their help in obtaining. Photocopied article will usually cost. See the Prime

Literature section following as well as the introduction to each bibliographic section for the major periodicals, sources, and methods of acquisition. Securing reprints from authors or organizations may incur some charges not identified in the bibliography.

Extension Service and Experiment Station Publications.

Generally available free by writing or phoning the agency. If out of print, go to your State land-grant library.

Federal Documents

Many of the USDA publications may be had free from the issuing agency by writing or calling them. Documents with major prices must be purchased, usually from:

U. S. Government Printing Office
Washington, D. C. 20402

Those available from NTIS may be purchased at:

National Technical Information Service
Springfield, Virginia 22151

ERIC documents may be purchased from:

ERIC Document Service
P. O. Drawer 0
Bethesda, Maryland 20014

Prices of all documents are subject to change, and some with no price may not now be free. Superintendent of Documents numbers have been added to facilitate ordering. Most land-grant libraries have the Supt. of Docs. items on deposit, and may also receive and store selected NTIS and ERIC documents.

Commercial and Private
Publishers

Several leading organizations are given with addresses at the beginning of each bibliographic section. Others may easily be obtained from a library. Major publications, particularly those from commercial houses, will be available at land-grant libraries for loan.

Lending Libraries and Photocopy Requests

State Land-Grant Libraries are recommended as the first point of contact when borrowing or requesting a copy of a journal article. They offer the closest source for information, documents, and reference assistance. If photocopies are required, a charge may be expected.

National Agricultural
Library

Loans will be made to local libraries where you may place your request. USDA employees may borrow directly. Payments for photocopies must accompany requests; many land-grant institutions have deposit accounts with NAL. Orders for photocopies, Library coupons for purchase, or requests for order blanks may be sent to:

National Agricultural Library
Lending Division
Beltsville, Md. 20705

Regional Medical Library
Service

The health citations might be more easily obtained through the RMLS established by the National Library of Medicine when they must be borrowed or copied from a journal. Eleven regions are established under the Service, and it is recommended that you contact your local land-grant library about service through this system.

SELECTED SOURCES OF INFORMATION ON RURAL DEVELOPMENT

These primary information resources were found to be valuable in the compilation and dissemination of information concerning all aspects of rural development. Other information contact points are given under each of the specific subject areas of this bibliography and should also be consulted. Also see the Guide to Federal Programs for Rural Development (USDA, Rural Development Service, 4th ed., 1975) for contact names.

U. S. DEPARTMENT OF AGRICULTURE

Rural Development Service

Mr. James R. Madison
Public Information Officer
Rural Development Service
U.S. Department of Agriculture
Washington, D. C. 20250
Phone: 202-447-6557

Service is responsible for helping rural communities to find sources of financial and technical assistance for developing facilities and services in rural areas. Facts on Rural Development Resources are issued as information becomes available on a specific subject. Yearly reports to Congress are also of interest. Distributes these and other publications.

Extension Service

Mr. Donald Nelson
Program Leader
RD Information
Extension Service
U.S. Department of Agriculture
Washington, D. C. 20250
Phone: 202-447-2548

Primary educational arm for RD in USDA. Its CRD Newsletter is indispensable for keeping up with rural development activities. Covers all subjects in this bibliography as well as the more usual ones of land use, economic development, community leadership, and related rural development topics. Free distribution and primarily intended for Extension CRD personnel. Sends publications and makes information referrals.

Agricultural Research Service

Director
Information Division
Agricultural Research Service
U.S. Department of Agriculture
Washington, D. C. 20250
Phone: 202-447-4433

Research in progress is in the CRIS system; will send their publications to those in agricultural research; many of the reports in recent years are on topics of direct interest to rural development.

Economic Research Service

Dr. William C. Motes
Economic Development Division
Economic Research Service
U.S. Department of Agriculture
Washington, D. C. 20250
Phone: 202-477-8225

Sponsors research and produces publications on agricultural economics and related socio-economic studies. Publishes Economics of Agriculture, a yearly annotated bibliography of its research studies.

Extensive collection of books,
periodicals, and other materials
covering agriculture and related
topics; responsible for building a
library of research materials,
most strongly in fields of agri-
culture related to rural
development.

REGIONAL RURAL DEVELOPMENT CENTERS

Established by directors of State extension services and experiment
stations under the Rural Development Act of 1972. These Centers are avail-
able to assist with inquiries or requests for regional rural development
information. All have publications and will send most free of charge.
Centers can supply information on expertise and projects under universities
and agencies throughout their region.

750 entries.

ON-LINE CITATION SEARCHES

The advances of computerized on-line citation services offer a new method for locating special citations or compiling limited bibliographies. Because of their wide availability today, three literature searching systems on-line are cited. Nearly all involve direct costs to the user.

CAIN

CAIN is the National Agricultural Library's cataloging and indexing output of 700,000 citations dating from 1970 covering journal articles, bulletins, and books from the world agriculture literature. The data base is available on-line from two commercial retrieval firms; approximately 20 other citation files, including that of the National Technical Information Service, are available from the same commercial services.

Services from NAL may be requested by writing to:

Reference Division
National Agricultural Library
U.S. Department of Agriculture
Beltsville, Maryland 20705
or
CAIN Hot Line: 301-344-3816

Several land-grant libraries also subscribe to the CAIN on-line service and may be able to provide searches. Main libraries at these land-grants are known to be on-line with CAIN:

University of Arizona
Auburn University
University of California at
Davis, Berkeley, & Riverside
Colorado State University
University of Florida, Hume
Library
University of Massachusetts
Michigan State University
University of Nevada, Fleischmann
Library

University of New Hampshire, Experiment
Station Library
North Carolina State University
Pennsylvania State University
Prairie View A&M University
Texas A&M University
Utah State University
Washington State University
University of Wisconsin,
Steenbock Library

MEDLARS

The Medical Literature and Analysis Retrieval System of the National Library of Medicine is based on Index Medicus: about 2,300 of 18,000 medical journals indexed since 1960. Access by key words; on- and off-line systems. May be tapped through requests to local medical school or hospital libraries.

SOLID WASTE INFORMATION RETRIEVAL SYSTEM (SWIRS)

EPA data bank of approximately 23,000 items. Includes citations from a core list of 700 serial titles, also cites reports, monographs, laws, and other related materials from the United States and abroad. Request service or information of:

U.S. ENVIRONMENTAL PROTECTION AGENCY

1975

A QUANTITATIVE APPROACH TO SOLVING COMMUNITY SERVICE PROBLEMS

Hardy, William E., Jr. and Curtis L. Grissom

Working paper, available from the authors, Department of Agricultural Economics and Rural Sociology, Auburn University, 1975, 8 pp.

Study of the least-cost solid waste collection and disposal system for a five-county area. Size and service area for each landfill and best routes for pickup trucks determined.

ANALYSIS OF COSTS FOR SOLID WASTE MANAGEMENT IN NONMETROPOLITAN OKLAHOMA, BULLETIN B-717

Schreiner, Dean F., Robert G. Davis, and Dean E. Barrett

Stillwater: Agricultural Experiment Station, Oklahoma University, 1975, 42 pp.

A study designed to: (1) estimate costs for collection and transfer processes; (2) estimate costs for sanitary landfill system; and (3) provide application in comprehensive planning of solid waste collection and disposal services to a multicounty planning region.

1974

PLANNING FOR THE MANAGEMENT OF SOLID WASTE MATERIALS IN RURAL AREAS

Carley, D. H.

Experiment (Griffin): Agricultural Experiment Station, University of Georgia, 1974, 24 pp.

Factors affecting alternatives for collection, transfer, and disposal of solid waste materials from rural households. Evaluation of alternatives by physical and cost relationships.

PLANNING FOR COMMUNITY SERVICES IN RURAL AREAS: A REGIONAL APPROACH TO SOLID WASTE MANAGEMENT

Grissom, Curtis L. and William E. Hardy, Jr.

Auburn: Agricultural Experiment Station, Auburn University, 1974, 52 pp.

A study of solid waste collection and disposal in five northwest Alabama counties. Results indicate there are gains to be realized from regional cooperation and coordination in the provision of services. Revised in January 1975 as AES Bulletin 464.

A community-wide approach to solid waste disposal and collection.

WASTE DISPOSAL SYSTEMS FOR RURAL HOMES, CIRCULAR AE-43

Witz, Richard L., George L. Pratt, Seb Bogel, and Charles W. Mailanen

Fargo: Cooperative Extension Service, North Dakota State University, 1974, 12 pp.

Presents plans and instructions for operation of various waste disposal systems. Elementary.

1973

SANITARY LANDFILL DESIGN AND OPERATION

Brunner, Dirk R. and Daniel J. Keller

Washington, D.C.: U.S. Government Printing Office, 1973

HANDLING SOLID WASTE MATERIALS IN URBAN-FRIDGE AND RURAL COMMUNITIES IN GEORGIA, BULLETIN 149, Carley D. H.

Experiment (Griffin): Agricultural Experiment Station, University of Georgia, 1973, 46 pp.

A study of types and costs of solid waste collection and disposal systems currently used by county governments and smaller municipalities in Georgia, projection of future volumes and planning.

NUTRIENT ENRICHMENT OF GROUND WATER FROM SEPTIC TANK DISPOSAL SYSTEMS

Dudley, John G. and David A. Stephenson

Upper Great Lakes Regional Commission. Available through Cooperative Extension Service, University of Wisconsin-Madison, 1973, 131 pp.

Quantitative data on role of septic tank system effluents in nutrient enrichment of lakes, reviewing effluent behavior in natural ground-water systems. Of importance for areas with extensive shoreline development or lake eutrophication.

COSTS OF SOLID WASTES MANAGEMENT IN RURAL TEXAS COMMUNITIES

Hall, J. Patrick and Lonnie Jones

Southern Journal of Agricultural Economics 5(1):115-119. July 1973.

Results of a survey to determine cost and quality information on solid waste management systems.

EVALUATION OF A RURAL SOLID WASTE STORAGE AND COLLECTION SYSTEM: THE WAYNE COUNTY, OHIO "GREEN BOX" PILOT PROJECT

Hitzhusen, Fred J. and Said Karkouti

Columbus: Department of Agricultural Economics and Rural Sociology, Ohio State University, 1973, 40 pp.

Pilot project studies system use and abuse, costs and benefits, operation and financing. Summary of policy recommendations.

SOLID WASTE MANAGEMENT, by D. Joseph Hagerty, Joseph L. Pavoni, and John E. Heer, Jr.

Van Nostrand Reinhold Co., 450 West 33rd Street, New York City 10001, 1973
302 pp. \$16.95.

Text with an engineering approach; has a 50-page chapter on sanitary landfills.

IMPROVING RURAL SOLID WASTE MANAGEMENT PRACTICES

Goldberg, T. L.

Washington, D.C.: Environmental Protection Pub. SW-107, U. S. Government
Printing Office, 1973, 83 pp. \$1.20, S/N 5502-00115.

Aspects of both residential and industrial rural waste problems are discussed, including types of collection, processing and disposal methods, financing, and citizen support.
